

RECOMMENDED BUILD SEQUENCE

1. Fuselage - carefully shape and align lower fuselage segments.
2. Engine cowling - carefully shape and align lower cowling segments.
Glue completed engine section to front fuselage.
3. Windscreen - bulge slightly before glueing sides and bottom to fuselage.
4. Wing - slide under fuselage top and roll front fuselage decking around leading edge.
Note that windscreen is farther aft than wing leading edge.
5. Wing slats : shape over a rounded surface before cutting out.
6. Horizontal and vertical tail - attach to fuselage.
7. Engine cowling and propellor.
8. Undercarriage.
